# TRUSS SYSTEMS

Visit [www.safeguardmetalbuildings.com](http://www.safeguardmetalbuildings.com)

Safeguard Metal Buildings can construct units from 12' to 60' feet wide, 6' to 20' feet tall and as long as you have either level land to accommodate it. We are able to offer this wide range of size options by utilizing four different truss designs which have been engineered to handle the varying snow and wind loads in each area we service. We have even gone as far as offering both a high and low clearance 32'-60' wide commercial truss to help you accomplish your storage needs, meanwhile mitigating expenses as much as possible.

# HOW TO PREPARE FOR YOUR STEEL BUILDING INSTALLATION

FIRST, DETERMINE IF YOUR SITE IS LEVEL OR NOT

IS MY SITE LEVEL?

**YES**

You're ready for installation

**NO**

See your leveling options below

YOUR LEVELING OPTIONS

**LEVEL EARTH**

Recommended for: Garages Commercial Units Carports Barns

**EARTH FILL**

Recommended for: Garages Commercial Units Carports Barns

**RETAINING WALL**

Recommended for: Garages Commercial Units Carports Barns

**CONCRETE SLAB**

Recommended for: Garages Commercial Units Carports Barns

**FOOTERS**

Recommended for: Carports Barns

**NON-FLOATING DOCK / DECK**

Recommended for: Carports

**CONCRETE PILLARS**

Recommended for: Carports Barns

**LANDSCAPING TIMBERS**

Recommended for: Carports

\*For Garages and Commercial Units, land must be level or warranty will be voided.  
\*\*For Carports, land must be level within +/- 4 inches or warranty will be voided.

The strength of a building lies in its foundation. The foundation that your building is built on will have a major impact on the quality and longevity for your unit. SMB highly recommends that you contact your local building department to discuss what foundation type's are allowed or recommended in your area. Below you will see that we have provided a brief visual sample of some of the most common foundation types utilized under our product line.

You can't build a great building on a weak foundation. You must have a solid foundation if you're going to have a strong superstructure.

-Gordon B. Hinckley

## CLEAR SPAN BUILDINGS

Clear span buildings built with a strong truss system by skilled professionals are a perfect solution for all your industrial, storage, and warehousing needs

## BARN BUILDINGS

Accommodate all your livestock, lawn, farming, and gardening equipment. Store your vehicles and protect them from mother nature with our robust steel barns.

## GARAGE BUILDINGS

Explore our range of affordable metal garages with different roof styles, custom designs, and color options to match your residential, commercial, or agricultural needs.

## UTILITY BUILDINGS

Metal utility buildings make excellent workshops, lawn equipment storage and a place to organize your recreational gear.

## PAVILION BUILDINGS

Explore our wide range of pre-engineered Pavilion Buildings or build your own with our on-line custom estimator.

## RV COVER BUILDINGS

Explore our range of affordable and durable prefabricated metal buildings for your boat, camper or RV.

## CARPORT BUILDINGS

Safeguard your cars with our certified metal carports. Explore our wide range of pre-engineered carports or build your own with our custom-building estimator.

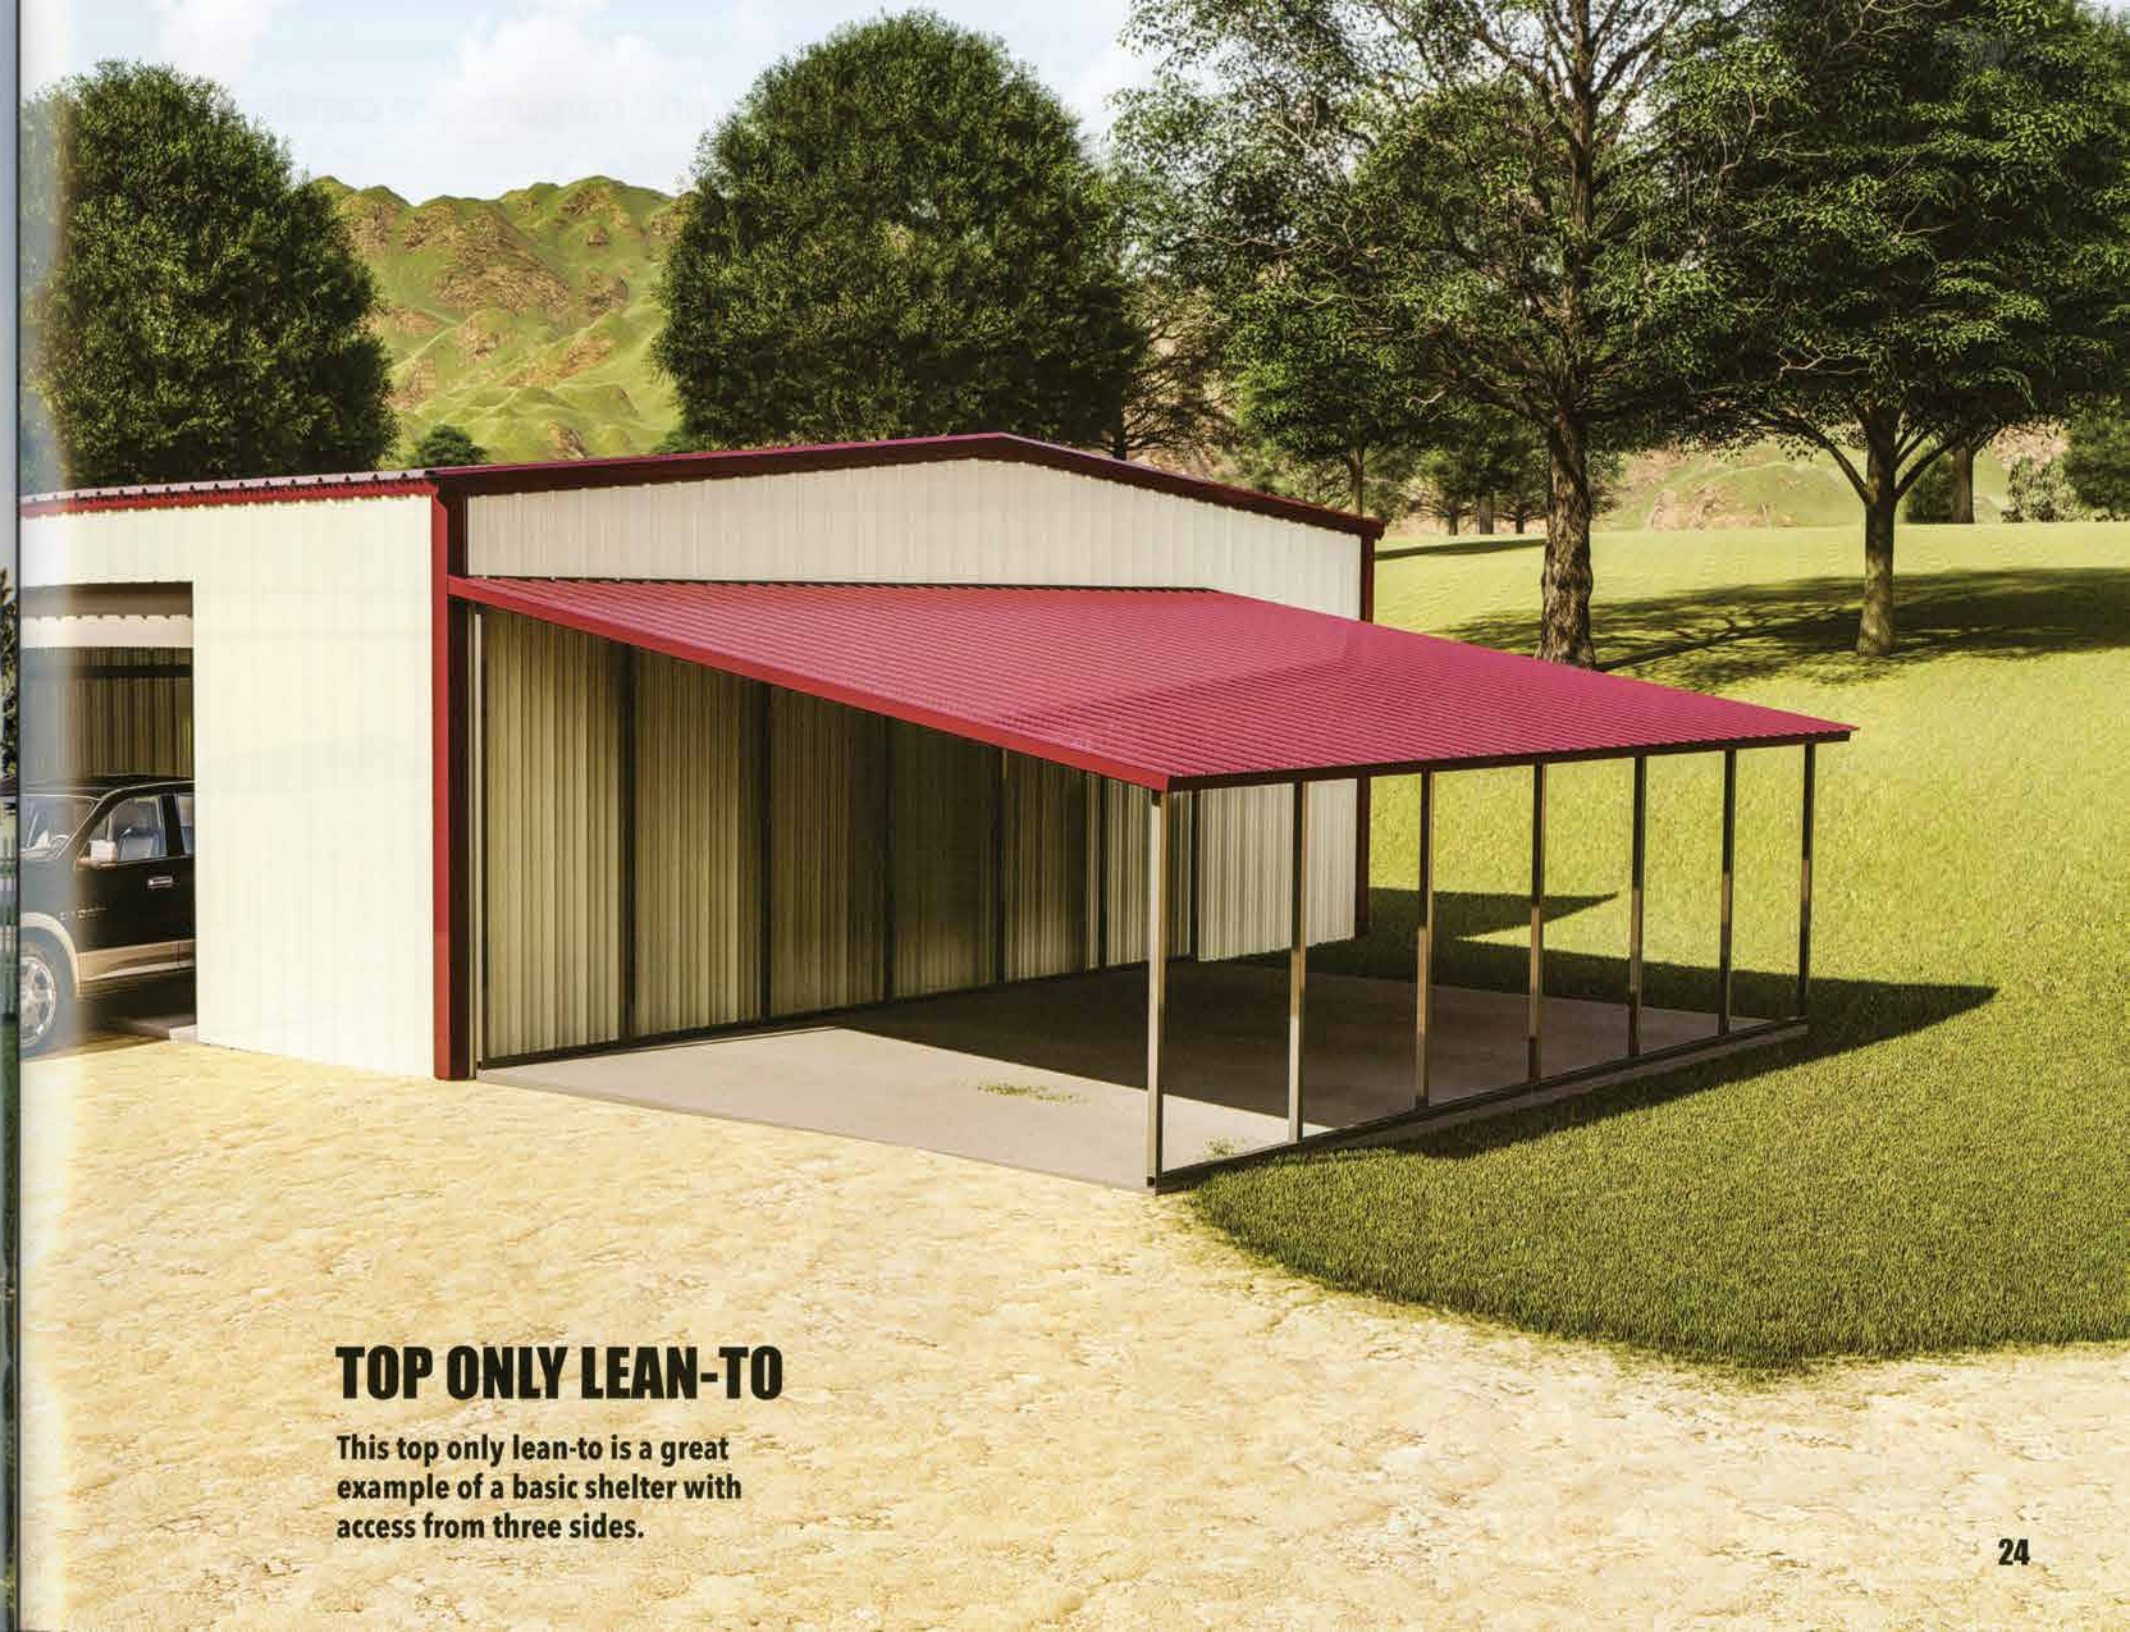

## LEAN-TO BUILDINGS

A lean-to shed, attached to an existing building such as a barn or garage, provides shelter for boats, tractors, cars or other equipment.

### FULLY ENCLOSED LEAN-TO

This free standing fully enclosed lean-to is a great example of an economical building for such use as a garage, office, and workshop.

### TOP ONLY LEAN-TO

This top only lean-to is a great example of a basic shelter with access from three sides.
